# Shantanu Panchal

shantanupanchal.dev@gmail.com | +91 9822326063| linkedin: shantanupanchal01 |github.com/Shantanu-0101/

## EDUCATION

**Bachelor of Engineering - Artificial Intelligence and Data Science** Sep 2024 - Jan 2028
**CSMSS Chhatrapati Shahu College Of Engineering, Chhatrapati Sambhajinagar**
sgpa: 7.0/10.0

Higher Secondary (Class 12) | Maharashtra State Board **| Percentage**: **78.00%** Feb 2024

Secondary (Class 10) | 2022 | Maharashtra State Board **| Percentage**: **93.20%** June 2022

Chhatrapati Sambhajinagar, Maharashtra, India

## TECHNICAL SKILLS

**Programming Languages:** Python, C, SQL, JavaScript, TypeScript
**Frameworks and Libraries:** NumPy, Pandas, OpenCV, TensorFlow, Keras, Fast API, React, Flask, React Native, LangChain
**Databases and Cloud Platforms:** MySQL, AWS, SQLite, Vector DB, PostgreSQL, MongoDB
**Tools and Platforms:** Version Control (Git), GitHub, Docker, Railway, Render
**Automation & Scraping:** Selenium, Requests, BeautifulSoup, Scrapy

## PROFESSIONAL EXPERIENCE

### AI Engineer Intern (Python, Generative AI, LLM's, Multi-LLM orchestration)

**Zep Analytics**, Odisha, India (Remote)| **Sept 2026 - Present**

- Built a research paper generation pipeline that learns writing style from uploaded papers and generates new academic content using RAG and multi-LLM orchestration.
- Designed a generate–evaluate–rewrite loop that detects fabricated citations, repetition, and style drift, then refines the output using Groq and Gemini.
- Integrated live web search (Tavily) to ground generated content with real references and relevant images.

### AI Engineer Intern (Python, Web Scraping, BeautifulSoup, Selenium, Requests, Scrapy)

**Pai Kane Group, Goa, India (Remote) |** Oct 2025 - Dec 2025

- Developed an automated web scraping pipeline using Python and Selenium to extract phone numbers, emails, and website URLs of enterprises and infrastructure projects.
- Performed margin anomaly analysis in Zoho Books by auditing ERP data and identifying visibility gaps.
- Created reports for non-technical stakeholders, reducing manual research time by 70–80% and improving data-driven decision-making.

## PROJECTS

**Autonomous Job Application Agent** (Agentic AI, Docker, Multi LLM orchestration )

- Built an AI agent using LangGraph that scrapes job postings, researches companies, and automatically tailors resumes and cover letters.
- Implemented multi-provider LLM orchestration (Gemini, GPT-4o, Groq) with human-in-the-loop approval and FAISS-based memory for deduplication.
- Deployed the application using Docker on Railway with a Streamlit dashboard and persistent state management.

**Remind You - Mobile Application** ( React Native CLI, TypeScript, Android Notifications, AsyncStorage, Android SDK.)

- Developed an Android app that generates and schedules random reminders to help users build habits through unpredictable notifications.
- Implemented local notification scheduling, reminder management, and persistent storage using AsyncStorage.
- Published the application on the Google Play Store,
